- Promoted to Shift Manager; responsible for managing and training staff members

Related Projects:

Manga Verse – Class group project for anime and manga fans to be able to browse thousands of anime and manga, and save them using a personalized account. This project vastly improved my understanding of CSS styles and introduced a new library called graphql.
https://github.com/Connor812/Manga-Verse

Cassie's CookBook – Blog style web page developed as a group class project where food lovers can browse and share their cooking recipes. This project allowed me to learn my interest in coding the server side of a web applications. I enjoyed breaking down the code into files I can easily maintain and organize for its easy readability.
